Activities:

11.1 Environmental Requirement

Timing:

	Phase 1	Phase 2	Phase 3	Phase 4	Phase 5
11.1 Environmental Requirements					

NISSAN MOTOR CORPORATION

11 - Environmental Requirements
11.1 - Environmental Requirements

Activity Purpose:

To confirm that the supplied products **conform** with the **environmental regulations** of each market.

Key Points of Activity:

- The supplier shall **inform** Nissan of the different materials contained within their products.
- The supplier shall **confirm** the specific requirements for this activity with Nissan in order to ensure that their products:
  - **Comply** with the relevant **environmental requirements** for chemical content.
  - **Comply** with the relevant **regulations** relating to the use of recycled and recyclable materials, including marking of specific material types.

Note:
IMDS ID number needs to report with Inspection Report

11.1 - Environmental Requirements

What is IMDS (International Material Data System)?

It is an internet portal in which the Suppliers can declare the raw materials and substances used in the parts delivered to Nissan

Principle of IMDS :

Successive sending of material and substances declarations:

- The Declaration are completed and implemented until the part is in its final definition.
- Each Supplier can accept or reject the Declarations proposed by TIER N Suppliers
