NISSAN
MOTOR CORPORATION

4.4 Engineering Product Specifications / Drawing Study and Completion

Activity Purpose:

- Design the product to achieve Nissan design goals: performance, function, reliability, durability, structure, shape, weight, service parts requirements, etc.

Note(s):

Phase	1	2	3	4	5
Activity Content		● Study and create technical specifications ● Create the engineering drawing/ CAD data ● Ensure that manufacturing constraints are incorporated into the product design so that the quality and reliability target are achieved.	● Implement design change management activity if engineering product specification/drawing content is changed.		
Output Document	● Engineering Product Specifications & Engineering Drawings / CAD data ● Supplier Recommendations
