Supplier Recommendations (SR)

Key Point(s):

- The supplier shall give all required information related to the use of the product by the manufacturer or the customer and the potential effect of disregarding recommendations.
- The supplier shall give all necessary recommendations and banning related to:
  - the relation between the product and the other parts it has to be fastened to;
  - the environment of the product once fitted in the car;
  - transport, storage, packaging and deconditioning of the product;
  - rules of process to be observed in fitting on the assembly line, stripping and winding up (in plant, in garage);
  - handling by the workers (or robots) on the assembly line or by maintenance agents.
  - recommendations and banning will figure efforts, temperatures, surface conditions, geometry, dampness, weights, etc …

Minimum Content Requirement(s):

- This document shall include the recommendations for :
  - functional use (only for vehicle)
  - logistics, deconditioning of the product
  - assembly
  - operators handling for fitting (including safety risks)
  - after-sales (rectification, repair, specific tool to use, …)
  - recommendations for driver use

Output Document Description:

- Supplier’s own document

Note:
- Some of the recommendations will be useful for the owner's manual (ex : "Warnings for use")
