7.1 Production Part Approval

Purpose:

Confirm that product and mass production process and mass production capacity meet Nissan requirements and get Production Part Approval.

Note(s):

- Mass production start and shipping of its parts to Nissan is not acceptable until interim or full Production Part Approval is provided.
- Nissan not fully approve PSW until report of Confirmation of full volume conditions is provided.
- Advanced information must be provided if full approval is not expected in line with Nissan requirements.
- If the Nissan PSW judgment is "Interim approval" or "Rejected", the supplier shall develop countermeasures in order to achieve full "Approval" status.
- Master Samples from all tool suites or cavities must be retained at the supplier for the life of the product.

Phase	1	2	3	4	5
Activity Content				● Complete and submit the Part Submission Warrant (PSW) with all supporting documentation necessary to confirm satisfactory completion of the requirements of NPQP. ● The submission date is defined in the Supplier Master Schedule.	● If a change occurs, follow the change management requirements.
Output Document				● Part Submission Warrant (PSW)
