NISSAN
MOTOR CORPORATION

10.1 Logistics & Packaging

Activity Purpose:

- Select the best logistics option & packaging specifications to ensure the conformity of the product is preserved.

Note(s):

- The documentation used to communicate the content of this activity with Nissan is specific by each company.
- The specific requirements are outside the scope of NPQP.
- For detailed guidelines on specific requirements, see the “Other Supply Requirement” on NSG (Nissan Supplier Guide)

Phase	1	2	3	4	5
Activity Content	● Propose the logistics and packaging specification to be used.	● Review and optimize the logistics route and packaging specification in line with the latest Nissan request.	● Review related documents and update if necessary.	● Confirm and validate the packaging specification meets the requirements specified in the relevant documents.	● If a change will occur, contact to Nissan plant or facility and request the instruction.
Output Document	● (RFQ Reply)	● Logistics and Packaging Data Sheet
