International Material Data System (IMDS)

Key Point(s):

- The MDS (Material Data Sheet) describes the decomposition of the part in sub parts, each sub part being discomposed in materials, each material in substances. This is required for each part designed for and supplied to Nissan.

Minimum Content Requirement(s):

- The suppliers shall comply with following Nissan requirement for the input of IMDS data.

  - NES-M0301 Prohibited substance in parts list and declaration mode or other standard if it is specified
  - NES-M0302 IMDS Documentation rule for suppliers

Output Document Description:

- International Material Data System (IMDS)
  (https://public.mdsystem.com/en/web/imds-public-pages/home)

  The supplier shall declare the ID/Version of the MDS (as much ID/Version as there are references inside)
